

"Edvin" Glass
Edvin Öhrström
1945

Overlay, deeply cut and polished glass. Decoration
of fish, turtles and starfish.
Signed Orrefors Sweden 1945 Edvin G
E.Öhrström.

Ref. 161237

The "Edvin Glass" were the first stage of a vase
made in the Ariel technique. Edvin glasses, were
made in a small number, they were polished and
therefore a finished piece. Normally the next part
of the process of making an Ariel vase, is to make
another layer of clear glass capturing the air in the
deep insets and then expanding the vase, a very
difficult process, in obtaining a controlled result.
